Airtel

Mock model question paper

Original sample material for demonstration and self-practice. Not an official company paper, an authentic previous-year paper or a statement of the company's hiring process.

Suggested time: 25 minutes | 5 questions | Self-practice

01. An item priced at INR 1000 is discounted by 15%. What is its sale price?

02. A vehicle travels 240 km in 4 hours. What is its average speed?

03. What does DNS do when a user opens a website?

04. How do latency and bandwidth differ?

05. How would you investigate intermittent connection failures?

Airtel - Answer guide

MOCK MATERIAL / Suggested answers for self-review

01. An item priced at INR 1000 is discounted by 15%. What is its sale price?

INR 850. The discount is 1000 x 15/100 = 150; subtract it from the original price.

02. A vehicle travels 240 km in 4 hours. What is its average speed?

60 km/h. Average speed = distance / time = 240 / 4.

03. What does DNS do when a user opens a website?

DNS resolves the hostname into an address that the client can use to connect to the service.

04. How do latency and bandwidth differ?

Latency is the time needed for data to travel or a request to complete. Bandwidth is the rate at which data can be transferred.

05. How would you investigate intermittent connection failures?

Correlate timestamps, affected locations, network paths, packet loss and service logs; compare failing and healthy sessions.
