## Mock model question paper

Original sample material for demonstration and self-practice. Not an official company paper, an authentic previous-year paper or a statement of the company's hiring process.

Suggested time: 25 minutes | 5 questions | Self-practice

01. An item priced at INR 840 is discounted by 15%. What is its sale price?

02. A vehicle travels 144 km in 3 hours. What is its average speed?

03. Explain encapsulation with a bank-account example.

04. What makes a database table reach second normal form?

05. How would you explain a technical delay to a client?

# Infosys - Answer guide

MOCK MATERIAL / Suggested answers for self-review

### 01. An item priced at INR 840 is discounted by 15%. What is its sale price?

INR 714. The discount is 840 x 15/100 = 126; subtract it from the original price.

### 02. A vehicle travels 144 km in 3 hours. What is its average speed?

48 km/h. Average speed = distance / time = 144 / 3.

### 03. Explain encapsulation with a bank-account example.

Keep the balance private and expose deposit and withdrawal methods that validate inputs and enforce balance rules.

### 04. What makes a database table reach second normal form?

It must be in first normal form, and every non-key attribute must depend on the whole of each candidate key, not only part of a composite key.

### 05. How would you explain a technical delay to a client?

Describe the impact in plain language, explain what is known, propose alternatives and agree on a realistic next update.
