Mock model question paper

Original sample material for demonstration and self-practice. Not an official company paper, an authentic previous-year paper or a statement of the company's hiring process.

Suggested time: 25 minutes | 5 questions | Self-practice

01. An item priced at INR 880 is discounted by 20%. What is its sale price?

02. A vehicle travels 204 km in 4 hours. What is its average speed?

03. How do unit tests differ from integration tests?

04. A service is slow but returns no errors. What would you check first?

05. Describe the difference between a process and a thread.

Wipro - Answer guide

MOCK MATERIAL / Suggested answers for self-review

01. An item priced at INR 880 is discounted by 20%. What is its sale price?

INR 704. The discount is 880 x 20/100 = 176; subtract it from the original price.

02. A vehicle travels 204 km in 4 hours. What is its average speed?

51 km/h. Average speed = distance / time = 204 / 4.

03. How do unit tests differ from integration tests?

Unit tests isolate a small unit of behavior. Integration tests check that multiple components interact correctly.

04. A service is slow but returns no errors. What would you check first?

Measure request timings, resource use, database query duration and downstream dependencies. Use traces or logs to identify the bottleneck before changing code.

05. Describe the difference between a process and a thread.

A process has its own address space. Threads within a process share its memory and resources while maintaining separate execution stacks.
